Profile

Hello, I'm Alexander Spanos from Greece. I started web development as a hobby and pretty fast realised that this is what I love to do, I then got obsessed with learning as much as I can. It wasn't long after college and many bootcamps that I started working as a professional web developer, soon I found my self always trying to be better and learn more and more. In every project, I try to achieve fast and quality optimised code.

Work experience

04/2016 – 09/2018
